TUES, MARCH 20TH
GSC NIGHT OF OPEN EDUCATION

Join Your Colleagues for Dinner and Discover:

- What Open Educational Resources (OER), Open Pedagogy (OP), and the broader ‘Open’ movement is all about.
- The compelling statistics that make Open Education important in today's higher education climate.
- Why GSC faculty are beginning to adopt Open Pedagogy and OER into their courses and work.
- How being involved in the USNH Open Education Initiative can enhance your teaching and students' learning.
- Professional development opportunities for GSC faculty, including the 2018 Academic Technology Institute.

Participants can expect to learn how the USNH ‘Open Education’ initiative is driving down textbook costs, actively engaging students in the learning process, and replacing "disposable" assignments with real-world activities at Granite State College and its sister institutions. Explore how your GSC colleagues have implemented OER and Open Pedagogy projects in their courses, and learn about ways in which you can participate in professional development opportunities to re-imagine your course design.

Meet the Presenter Dr. Karen Cangialosi
Faculty Fellow, KSC Faculty Enrichment Program (Open Pedagogy Learning Community)
Member of the USNH Academic Technology Steering Committee

Karen is a professor of biology at Keene State College. She teaches Animal Behavior, Evolution and Human Behavior, Tropical Marine Biology, Invertebrate Zoology and Ecology & Evolution. She runs a coral reef monitoring program in the Turks and Caicos Islands, and does research on spider behavior. Karen has spearheaded a movement to use OER in several Biology courses at KSC and has incorporated methods of Open Pedagogy in several courses over the past few semesters. Recently she served as a Faculty Fellow in the KSC Faculty Enrichment program where she facilitated a learning community on Open Pedagogy and helped to organize an Open Education speaker series.

Deadline to Register: Friday, March 16, 2018
